CLASSICS PLUS LTD.

The summer of 1988 is when Mike Freund gave the northland the opportunity to freeze its cars in time forever, and he's been winning national titles for it ever since. Classics Plus, Ltd. located in N. Fon du Lac, Wisconsin holds a three tiered generation of skilled hands that disassemble, strip, rebuild and perfect classic cars. It all started in Mike's six year old imagination after seeing American Graffiti, and came to life seven short years later when his dad bought a 1940 Chevy Coupe.

The Freund Classics Plus, Ltd. family consists of owner Mike, his wife, his parents and his son. They come from a line of classic car lovers, most notably Mike's dad who taught him the ropes of restoration when he purchased a 1955 Chevy two-door Bel Air to get the family around. The Chevy's potential matched that of the Freund's, and it became the first car Mike helped restore at only thirteen years old. Mike didn't want to

stop at just restoring cars, though. He wanted to put his unique spin on these pieces and ensure that they lasted forever...and do it the right way, a character many car lovers spend years hunting for. Mike knew that the only way to do this was by opening his own shop.

The first vintage wheels to roll into Classics Plus, Ltd., were that of a 1956 Chevy Bel Air two-door hardtop. All cars have their story, and this one went full circle, beginning in Mike's family. His uncle had owned it years before and sold it to a friend who heard of the young entrepreneur's gift of restoration. The Tri-Five Chevy's soon became Mike's favorite classic to restore. Growing up along with them, he learned them inside and out. He's seen them on their last leg and put his own thoughts, details and custom paint jobs into turning them into award winning, unique, lasting pieces of art. Now Mike provides custom paint jobs, stainless

steel trim, steering wheel restoration... anything in between disassembly and reassembly to any classic car deserves.

The next time you're looking for an award-winner and someone who can match the passion and eagerness for your classic that you have, you can bet that the hands at Classics Plus, Ltd. will turn your vision into a reality beyond your expectations. You give them the car, and they'll give you the honesty, time, dedication, focus and product that you'll be thrilled to drive. Oh, and if you happen to own a 1932 Ford five-window coupe like the one from American Graffiti, bring it in to Mike to restore and make his dream come true! //
